

Palantir AIP Bootcamp for Data Engineers

Duration: 10 Days – 40 hours

Learning Objectives

By the end of the program participants will be able to

- Understand Foundry Architecture
- Build Ontology
- Use AIP for enterprise AI
- Create AI Agents
- Build Retrieval Augmented Generation (RAG) applications
- Design Prompt Engineering workflows
- Use Agent Studio
- Integrate LLMs
- Build enterprise copilots
- Prepare for Palantir AIP Certification

Day Wise Agenda

Day 1

Introduction to Foundry for AI Engineers

Topics

- What is Foundry
- Platform Architecture
- Data Lineage
- Ontology Overview
- How AIP fits into Foundry
- Workshop Navigation

Lab

- Upload datasets
- Explore Foundry

- Create first project

Deliverable

Foundry Workspace

Day 2

Data Foundations for AI

Topics

- Data Connections
- Pipelines
- Code Repositories
- Data Transformations
- Data Quality
- Semantic Layer

Lab

Create

- Customer Dataset
- Product Dataset
- Orders Dataset

Deliverable

Business-ready Data Assets

Day 3

Ontology for AI Applications

Topics

- Objects
- Object Types
- Relationships
- Actions
- Functions

- Ontology Manager

Lab

Create

- Customer
- Order
- Product
- Sales Representative

Deliverable

Enterprise Ontology

Day 4

Introduction to Palantir AIP

Topics

- What is AIP
- Enterprise AI Architecture
- LLM Integration
- Prompt Engineering
- Semantic Search
- Context Windows
- Retrieval Augmented Generation (RAG)

Lab

Build

- AI Q&A Assistant
- Enterprise Search

Deliverable

Knowledge Assistant

Day 5

Building AI Agents

Topics

- Agent Studio
- Agent Design
- Agent Skills
- Multi-step Reasoning
- Tool Calling
- Function Execution
- Memory
- Context Management

Lab

Build Sales Operations Agent

Capabilities

- Answer Questions
- Retrieve Data
- Recommend Actions
- Execute Functions

Deliverable

Enterprise AI Agent

Day 6

Enterprise AI Workflows

Topics

- Human-in-the-loop
- AI Actions
- Workflow Automation
- Decision Support
- AI Governance
- Security

- Auditability

Lab

Create

- AI Approval Workflow
- AI Assisted Ticket Resolution
- AI Incident Response

Deliverable

Operational AI Workflow

Day 7

Advanced AIP

Topics

- Agent Collaboration
- Multi-Agent Systems
- AI Evaluation
- Prompt Optimization
- Agent Performance
- AI Observability
- Cost Optimization

Lab

Build

Multi-Agent Assistant

- Research Agent
- Planner
- Data Agent
- Reporting Agent

Deliverable

Enterprise Multi-Agent Solution

Day 8

End-to-End AI Solution

Capstone

Build an Enterprise AI Copilot

Features

- Enterprise Search
- Natural Language Queries
- KPI Analysis
- AI Recommendations
- Root Cause Analysis
- Workflow Automation

Day 9

Industry Use Cases

Participants implement one of the following

- Manufacturing AI Assistant
- Banking AI Copilot
- Insurance Claims Agent
- Healthcare Knowledge Assistant
- Supply Chain Copilot
- Procurement Agent
- HR Assistant
- IT Operations Copilot

Day 10

Certification Preparation

Topics

- AIP Architecture Review
- Common Design Patterns

- Prompt Engineering Best Practices
- Enterprise AI Governance
- Certification Mock Test
- Hands-on Challenge
- Viva
- Q&A
